01

The world is changing

“There are two ways to grow your money.”

The old world fades. A new one rises.

HIER

- Handing your money to a black box
- Following a guru without understanding
- Enduring scams and false promises
- Depending. Always depending.

AVEC ORG

- Understanding what you do
- Keeping your money with you
- Deciding for yourself, with tools that bring clarity
- Moving forward free, in confidence.

L'IDÉE The real luxury today: that you understand and stay in control — not that someone manages for you.

Two camps are forming. You choose yours.

This change won't wait for you. It's already creating winners — those who become autonomous — and spectators — those who stay dependent.

Become autonomous

Understand, decide, build your own capital.

See clearly

The market stops being a mystery.

Take your place

The window is open. Now.

THE TRUTH THEY HIDE FROM YOU

You keep your money. Always.

ORG never touches your funds.

You see everything. You stay in control. You move forward with confidence.

Transparency isn't a constraint. It's your security.

THE MARKET IS REAL

Every universe, truly covered.

BRVM The African market — our spearhead

Crypto Major chains & altcoins

Gold & commodities Safe havens & commodities

ETF Diversified baskets

European stocks Large caps

US stocks The US leaders

The screenshot shows the 'Catalogue Data Providers' interface in the ORG Admin Console. It displays a table with 21 total providers, 2 active, 1 in evaluation, 0 on pause, and 18 planned. The table lists various providers like CoinGecko, EODHD, Alpha Vantage, Binance, Bloomberg Open Mkt, Coinbase, CoinMarketCap, Finnhub, FinancialModelingPrep, IEX Cloud, and Marketstack, along with their status, tier, price, and covered universes.

02

What ORG does for you

“Four products. Under the hood: a powerful, reliable system.”

Sentinelle

Building capital — not quick cash-flow. Growing an asset base that works over time.

Sentinelle answers the real question: what to buy, when, in which universe — without scattering.

THE ORIGIN Born in 2017 from 52-week highs, tested on the BRVM, then coded into an algorithm.

Sentinelle: what it changes for you.

Sentinelle

*You understand.
You decide.
You stay in control.*

OBJECTIF

Build and grow an asset capital

COMMENT ÇA AGIT

Strength screening + filters, across 7 universes, steady pace

NIVEAU DE RISQUE

Adjustable to your profile, from cautious to dynamic

POUR QUI

Those who want to build over time, not gamble

UNIVERS

BRVM, crypto, gold, ETF, Europe, US

Three engines that cross-check to keep only the solid.

52-Week Scanner

Spots strong assets near their one-year high.

Regime filter

Allows entry only with the underlying trend (price > MA200).

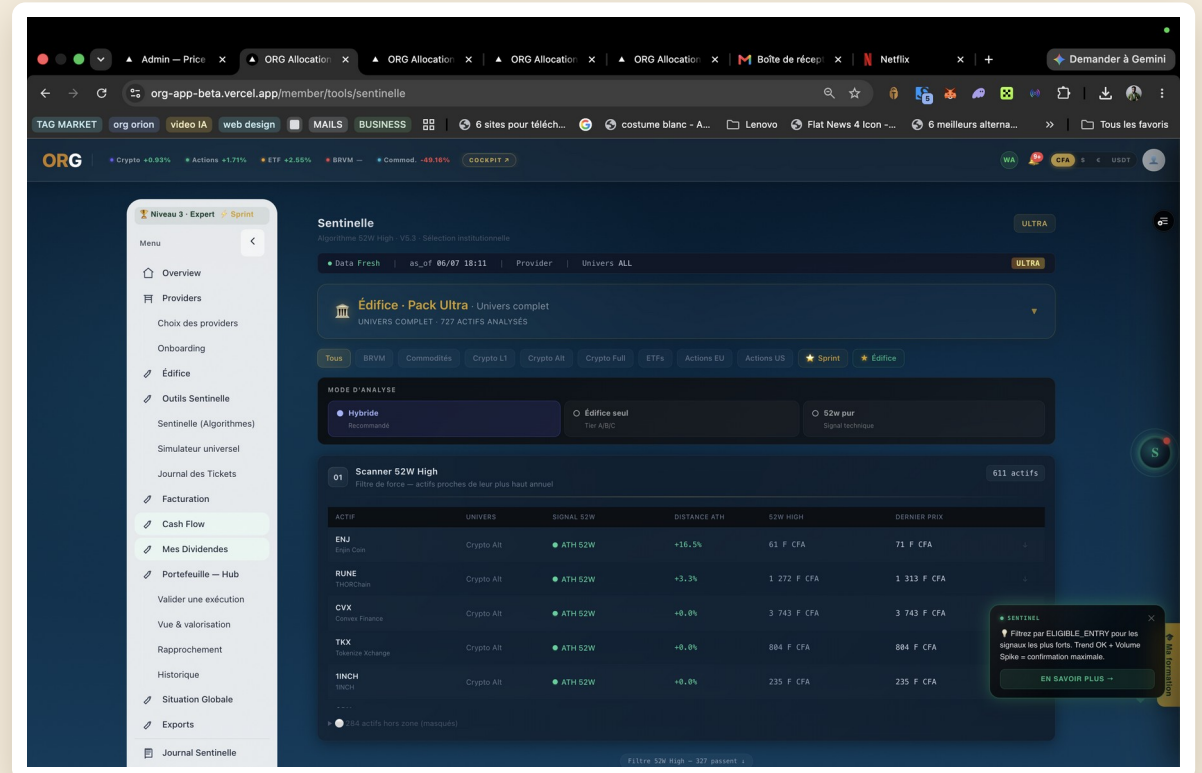

Risk management

Size, stop and targets tailored to your profile.

WHAT MATTERS Buy strength, then filter (Volume, Relative Strength, multi-horizon).

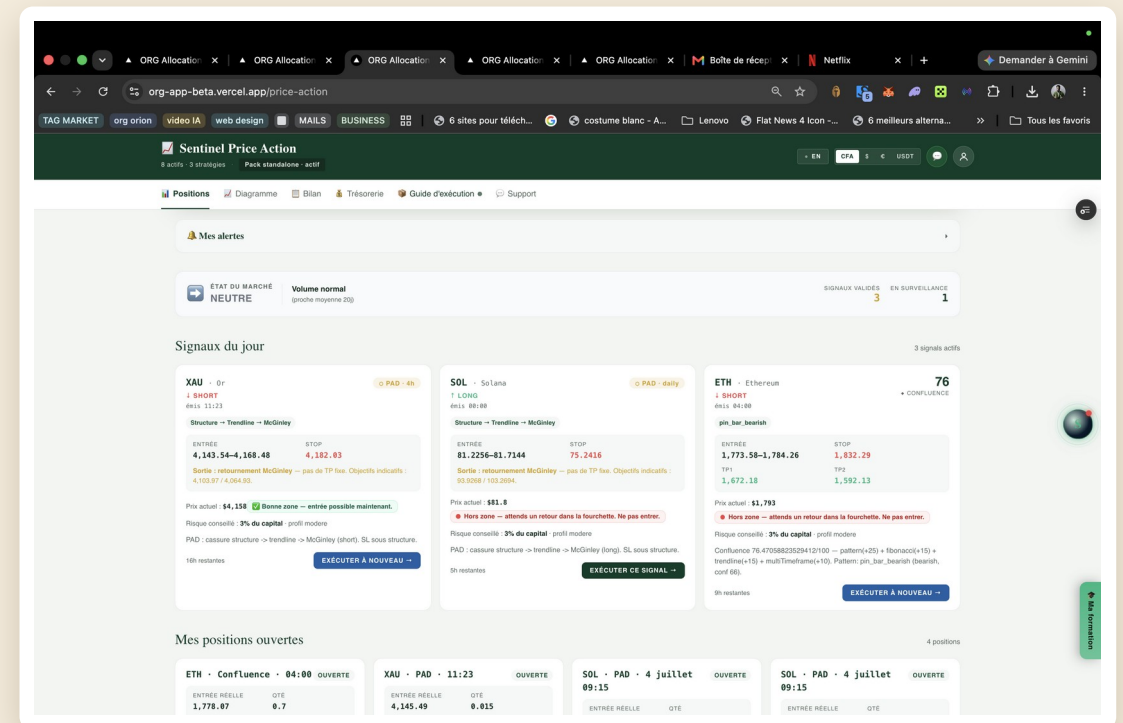

Sentinelle — 52W High Scanner, full universe (real)

Price Action

Precision. Reading the market through price itself — a method forged by hardship, after the false prophets of 2022.

Price Action ends dependence: understand and act with method, rather than follow a guru.

Signals of the day, live — Confluence & PAD (real)

Price Action: what it changes for you.

Price Action

*You understand.
You decide.
You stay in control.*

OBJECTIF

Capture market moves with method

COMMENT ÇA AGIT

3 engines — trend, directional, range — 100% descriptive

RYTHME

More active, framed by strict discipline

NIVEAU DE RISQUE

Framed by descriptive trade management

POUR QUI

Those who want to understand AND act, not endure

Three engines, one for each face of the market.

Confluence

Trend: evidence stacks up (10 setups + underlying gate, threshold 65).

PAD

Directional: breakout & Fibonacci retracement, McGinley flip.

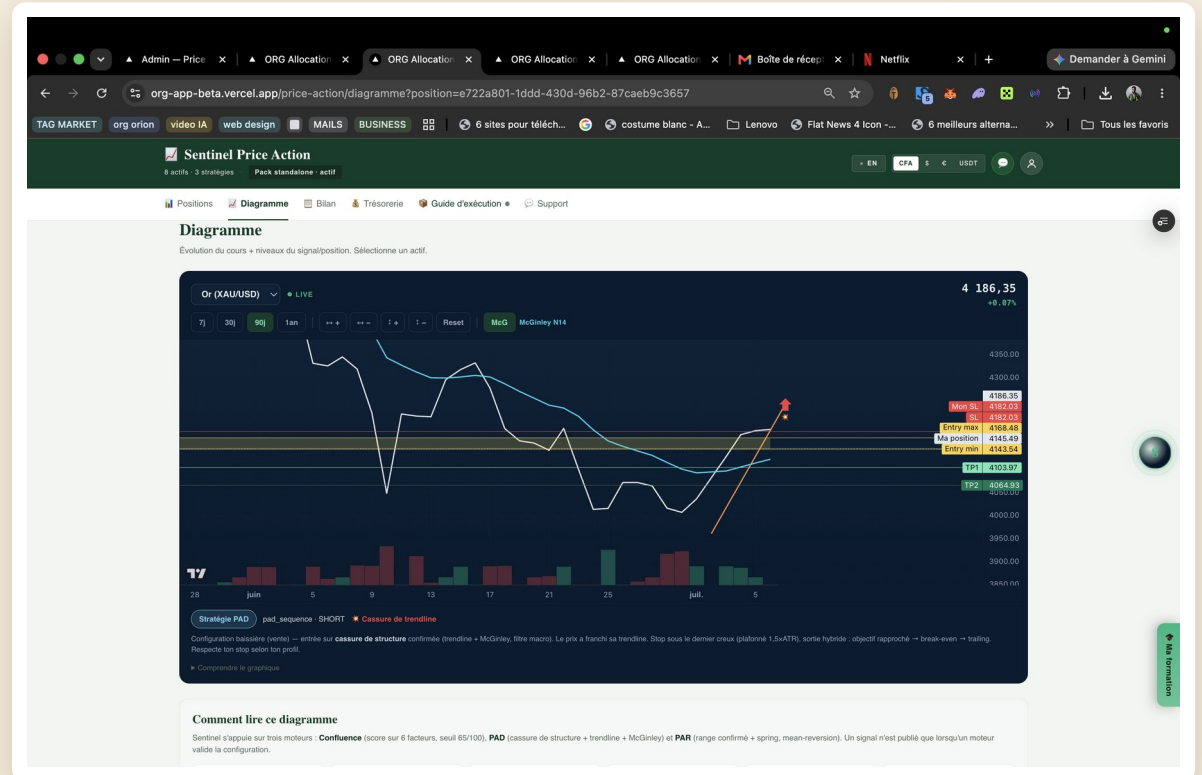

PAR

Range: mean-reversion, native detector — validated out-of-sample.

SAFEGUARD Any engine change goes back through an out-of-sample backtest.

Real chart — entry / stop / targets, McGinley & PAD

Édifice

Clarity. Knowing whether a company — or an asset — is solid BEFORE putting a single franc in.

Édifice ends blind investing: telling the robust from the fragile, with method.

THE ORIGIN Inspired by the great agencies (Morningstar, MSCI, Messari), applied where it's rare.

Édifice: what it changes for you.

Édifice

*You understand.
You decide.
You stay in control.*

OBJECTIF

Tell a robust company from a fragile one

COMMENT ÇA AGIT

Quality score 0-100 by asset class

METHOD

World rating standards, 12 pillars

NIVEAU DE RISQUE

Reduces the unknown, informs every choice

POUR QUI

The investor who wants to choose knowingly

A rating engine that filters BEFORE the technicals.

Quality score 0-100

12 pillars. Only the best-rated assets move to the next step.

● **Crypto** — cap, tokenomics, whitepaper, on-chain, age

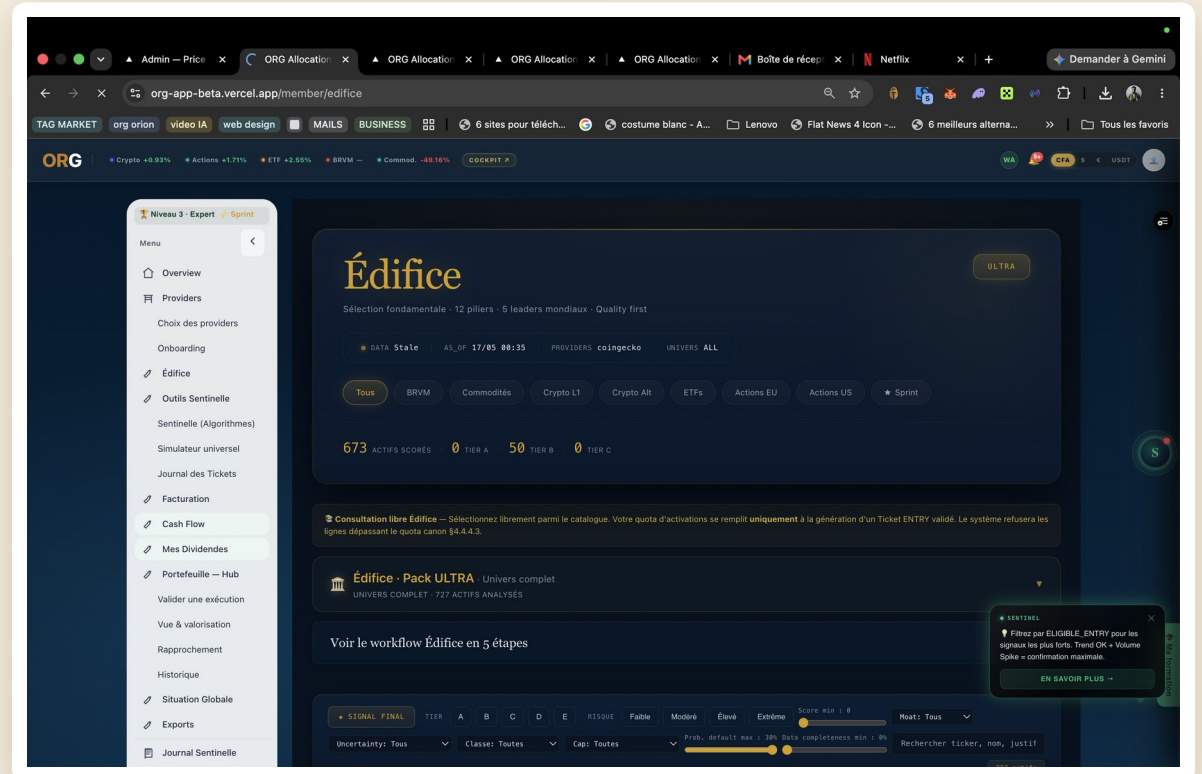

● **Stocks** — P/E, ROE, debt, cash-flow, macro

● **Gold & commodities** — real rates, dollar, supply/demand

● **ETF** — composition, fees, liquidity

KEY POINT We only deep-dive what is already solid.

Édifice — fundamental selection, 12 pillars (real)

Formation

Autonomy. We don't sell you a fish: we teach you to fish, until you depend on no one.

Formation tackles dependence at the root: understand, recognize, manage your risk — by yourself.

THE ORIGIN A tiered curriculum, with exercises and exams — not a PDF that gathers dust.

Formation: what it changes for you.

Formation

*You understand.
You decide.
You stay in control.*

OBJECTIF

Make you autonomous: understand, decide, manage

COMMENT ÇA AGIT

3 tracks (Sentinelle, PA, Édifice) + foundation module

L'ESPRIT

Alive, hands-on, assessed — not dormant

NIVEAU

From beginner to those who want structure

POUR QUI

Anyone who wants to truly learn

A structured, measured, supported pedagogy.

Tiers & modules

From foundations to trading: each notion laid out, illustrated, practiced, validated.

● **Foundations** — charts, candles, trends, volume

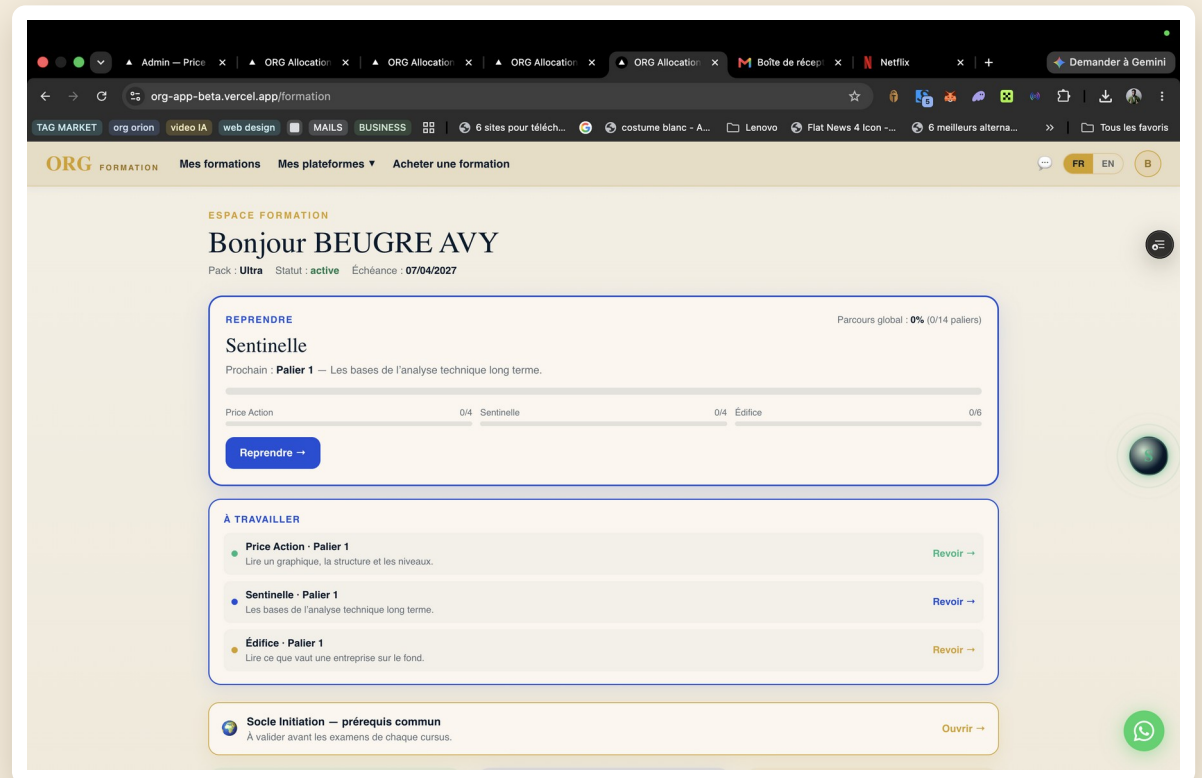

● **Method** — 52 weeks, McGinley, Fibonacci, ATR

● **Confluence** — stacking evidence — threshold 65

● **Support** — bots available everywhere

ALIVE Exercises + threshold exams: learning is truly validated.

04

Why now

“It's not just a product. It's a comeback.”

How many lost their community trying to do good?

Dragged down by projects that betrayed them, many leaders saw their credibility and their people's trust collapse. Those trials weren't in vain: they forged keys.

2017

The highs, tested on the BRVM — then turned into algorithms.

After 2022

A method forged by hardship, against the false prophets.

Today

ORG: reclaim your credibility, rebuild your community.

THE PARTNER PROGRAM

Carry ORG — and earn a living from it.

A final “product”: present ORG, support your people, and be paid on real sales — never on mere recruitment.
